## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "to relieve a state of hermetic sealing" is not clear. If one relieves a hermetic sealing, then presumably the seal is broken, but the claim apparently intends to recite a sealed device. So how would one determine what is meant by "a state of hermetic sealing," and how would one know whether the state is "relieved." How would one know if the claim is infringed?

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takekuma in view of Japan 9-83018.

Each of the references shows a light emitting chip, surrounded by soft resin underneath a lens, within a holder, and integrated with a lead frame. As shown in figure

Art Unit: 2811

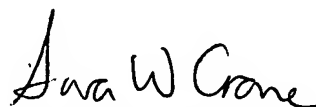

3b of Takekuma, the pressure of pressing the lens into place is relieved by flow of the soft resin into the shape of the lens. In view of this teaching, one of ordinary skill would understand that a similar flow had to take place when the lens of the Japan 9-83018 reference was placed in position. The relieving of pressure would be relieving of a state of hermetic sealing. And there would be no optical influence on the chip, because the resin is transparent. Hard resin for the holder would have been obvious to provide the needed mechanical stability.

Claims 10-16 are allowed.
